

SANDISK NAS 600 SATA SSD 500GB 2.5-Inch

Model: SDSNS2500GAB-000G0

Manufacturer: SANDISK

EAN: 619659234591

Product Code: 1179203

R5,042

SanDisk NAS 600 is a 2.5" internal solid-state drive designed for network-attached storage systems that require consistent, around-the-clock operation. It combines 3D NAND TLC with an SLC cache to deliver responsive performance and high random I/O, helping NAS arrays handle concurrent access and mixed workloads with reduced latency. The drive offers 500 GB capacity, SATA-600 connectivity, and an endurance rating that supports sustained use, while low active and idle power draw helps reduce operating costs in always-on environments. Built to meet multiple compliance standards and with a high MTBF, this SSD is intended to provide reliable storage durability and predictable performance in NAS deployments.
