The SanDisk Optimus GX PRO 850P is an internal hard drive designed for demanding applications and users seeking fast data access. With a capacity of 1 TB, it utilizes PCI Express 4.0 x4 (NVMe) interface technology to deliver internal data rates of up to 7300 MBps for read operations and 6300 MBps for writing. Incorporating advanced 3D triple-level cell (TLC) NAND flash memory ensures reliable performance and longevity, while the integrated heatsink efficiently manages thermal output during intensive use.

Built to withstand a range of environmental conditions, this solid-state drive operates smoothly in temperatures from 0°C to 85°C and has a storage temperature range of -40°C to 85°C. It features an endurance rating of 600 TB, making it suitable for extensive write applications. With shock and vibration tolerance ratings of 1500 g and 5 g respectively, the GX PRO 850P ensures durability in challenging operational settings, solidifying its place as an option for users demanding speed and resilience in their storage solutions.
