Clip On Your Style

Effortless sound, elevated style. With its compact open-ear design, OpenDots Air blends seamlessly into your daily look—an accessory built for living, not just listening.

Built to move with you

Shokz JointArc is a flexible nickel-titanium plate that adapts to different ear shapes while maintaining a secure hold.

An ergonomic design combined with skin-soft silicone adds stability where it counts, so you can stay focused on your music—not your fit.

Comfort that stays open

Our signature open-ear design allows air to flow freely around the ear, helping keep your ears comfortable during long listening sessions. At 6.3g[1] per earbud, OpenDots Air balances a light, breathable fit with everyday awareness, so you can move through your day with confidence and ease.

Rich sound in a compact design

Powered by custom our 11.8 mm dual drivers and Shokz Bassphere™ technology[2], OpenDots Air delivers audio performance on par with a larger 16 mm round driver.

Vocals are clear, while lows, mids, and highs stay well balanced at any volume. Even with its compact design, OpenDots Air produces rich sound with impressive depth and presence.

Sound that adapts to your day

Choose from preset sound modes designed to match your listening style.

Interchangeable by design

No left. No right. OpenDots Air knows exactly how you're wearing it, thanks to Dynamic Ear Detection Technology. Clip them on, listen freely, and enjoy automatic pause and resume when you take them off or put them back on.

Precision control at your fingertips

Control your audio with a simple tap or pinch. The force sensor responds to your pinch for precise commands.

AI-powered clear calls

OpenDots Air uses AI-powered noise reduction and dual microphones[6] to keep your voice front and center during calls. With optimized microphone placement, conversations stay clear—even when you're on the move.
