Both 2.4 GHz and 5 GHz bands are upgraded to the latest WiFi technology with faster speeds and higher efficiency, ensuring a smoother experience for all applications. Enjoy fluent 4K/8K streaming, immersive gaming, and blazing-fast downloads.

Extensive WiFi Coverage and Stronger Signals

A high-performance antenna array and beamforming technology combine to adapt WiFi coverage to perfectly fit your home and concentrate signal strength towards every device.

Whole Home Coverage Backed by a Robust Backhaul

Empowered by EasyMesh technology, HB210 delivers strong WiFi signals to every corner of your home. Wireless backhaul and ethernet backhaul work together to link each unit, providing even faster network speeds and truly seamless coverage. Want more coverage? Simply add another HB210 unit wherever you want.

Seamless Roaming with One WiFi Name

All units work together to form one unified network. Your mobile device will automatically connect to the fastest unit when you move through your home, creating a truly seamless WiFi experience.

More Connections, No More Buffering

Enhanced by WiFi 7 and featuring OFDMA and Multi-link operation (MLO), you can connect 200+ devices simultaneously to build a fully connected home. Enjoy a more efficient network that loads faster without dragging down performance.

2-in-1 Router and Access Point

The versatile and multi-purpose HB210 features options to serve as either a router or access point. Select the mode that suits your requirements for adaptable wireless and wired networking.

Gigabit Wired Connectivity

Each unit features two Gigabit Ethernet ports, a WAN/LAN port, and a LAN port, ensuring fast and stable wired connectivity for internet access and Ethernet backhaul to strengthen the mesh network.

Easy to Set Up and Use

You can set up your device and network in minutes, whether you prefer the powerful Aginet app or the intuitive web interface. The Aginet app allows you to manage your mesh network from a smartphone or tablet.

Supports TR-069/TR-369 Remote Management

ISPs can remotely configure and manage devices via their ACS (Auto-Configuration Server) system or the Aginet ACS. High-level operations are also supported thanks to compatibility with TR-181, TR-111, and TR-143 protocols. While the home user can enjoy more efficient service experiences.

An End-to-End Management Platform for ISPs

The Aginet solution offers ISPs powerful and flexible platforms to manage multiple devices for connected homes, such as dynamic service provisioning, zero-touch firmware upgrading, and remote troubleshooting and mesh WiFi diagnostics.
