Darkflash V92 9.2" IPS Monitor (White)

The Darkflash V92 is a compact 9.2-inch IPS monitor with a resolution of 1920 × 462 px, designed to expand your computer’s workspace in a unique way. The widescreen display with a viewing area of 225.6 × 54 mm is perfect for displaying graphics, system statistics, shortcuts, a clock, or weather information. Also noteworthy is the slim aluminum design, measuring 244.66 × 63.14 × 12 mm and weighing approximately 200 g, which blends perfectly with a modern computer setup.

An additional screen to refresh your workspace

The monitor’s ultra-wide format allows you to conveniently display the most important information without taking up valuable space on your main screen. You can use it to monitor your computer’s components, view your calendar, or display your own graphics and animations. It’s a practical solution for gamers, streamers, creators, and anyone who wants to give their setup a more functional and modern look.

IPS Panel and High Image Quality

The IPS panel ensures accurate color reproduction and a clear, sharp image—no matter the viewing angle. The 1920 × 462 px resolution guarantees high detail, ensuring that text, graphics, and interface elements remain sharp and easy to read. The monitor is perfect for both everyday work and as an attractive decorative element for your computer setup.

Simple installation and convenient connection

The set includes an L-shaped mount that allows for stable placement of the monitor on your desk. Additionally, 4 mm mounting holes are available. The device can be connected via a USB-C or 9-pin USB 2.0 cable, making it easy to integrate with your computer.

Customization with Darkflash software

The monitor works with the dedicated Darkflash software, which lets you create your own interfaces and customize how information is displayed. You can freely configure themes, add widgets, and switch between landscape and portrait modes. You also have access to a wealth of free online templates. The device supports various file formats, including JPG, GIF, and MP4—you don’t have to limit yourself.

Robust aluminum construction

The aluminum alloy housing ensures high durability and an aesthetic appearance. The slim profile, just 12 mm thick, gives the device a light and modern look, and its compact dimensions (only 244.66 × 63.14 × 12 mm) allow you to easily place it under your main monitor, next to your keyboard, inside your computer case, or in any other convenient location.
