R16,375

BenQ Creative Pro PD2732U is a 27-inch 4K monitor designed for creative professionals who need accurate color and a productive workspace. It supports wide color gamuts including full sRGB and Rec 709 coverage as well as near-complete Adobe RGB and DCI-P3, helping deliver reliable color for photo, video, and design work. The monitor combines a high-resolution IPS panel with HDR10 support, factory calibration, and uniformity technology to provide consistent brightness and color across the screen for critical review and content creation.

Connectivity and workflow convenience are built in with Thunderbolt 4 inputs and output for daisy chaining, USB-C upstream and downstream ports, an integrated USB hub, and an onboard KVM switch for managing multiple systems. The stand offers extensive ergonomic adjustment including height, pivot, swivel, and tilt so the display can be positioned for long design sessions, while features like DualView, picture-in-picture, and various creative display modes streamline comparison and
