R1,365

Huion H430P graphics tablet

Are you an artist and looking for a reliable, precise tool for everyday work? Huion H430P is a graphics tablet that is perfect for both dynamic osu game! and creative work. Ultra-thin (only 6.3 mm thick) and as light as a smartphone (135 g), it provides maximum comfort of use without discomfort. Equipped with a sensitive, battery-free stylus, high-resolution pen and intuitive buttons, the H430P offers everything you need to express your ideas freely - without restrictions and on any operating system.

Ultra-thin design and full mobility

The H430P tablet weighs just 135 grams and measures only 6.3 mm thick, so it will easily fit in a bag or backpack. Such a compact form is not only convenient to transport, but also more comfortable during long work - even many hours of drawing sessions or playing osu! do not cause wrist fatigue. It is also great for outdoor work.

Draw with feeling

The tablet allows impressively precise rendering of details thanks to up to 4096 levels of pressure sensitivity. This means that every line - from the softest to the strongest - will be faithfully rendered, allowing you to work freely and expressively creatively. Completely as if you were drawing with a traditional pencil!

High resolution of the pen

The resolution of the stylus at 5080 LPI provides incredible accuracy and allows you to focus on the details of your designs. This allows you to fully realize your artistic potential and take care of every little element of your work.

Immediate response to every movement

The fast response time (233 PPS) ensures that every movement of the stylus is registered in real time. As a result, lines are smooth and the tablet follows your hand without any delay, allowing you to create without interruptions and in full focus. From now on, your every digital creation will look exactly as you planned!

Battery-free stylus - always ready for action

In addition to the tablet, the kit also includes the PW201 stylus, which works without charging. Thanks to EMR (electromagnetic resonance) technology, you can forget about cables and charging interruptions - just plug in the tablet and start creating! This is an extremely useful solution when working on the road or in the open air.

Work faster with programmable buttons

Four customizable buttons on the tablet body allow you to assign the functions and shortcuts you use most often, which significantly speeds up work and improves ergonomics. This is an ideal solution for those who value smooth operation and time saving.

Full compatibility with popular software
