even in the fastest FPS games.

Smooth and stable operation

The Zircon 880 1K uses the Telink 8271 chipset, which provide stable reporting at 1000 Hz. This combination guarantees smooth tracking and precise motion reproduction, ideal for both daily ranked gaming, work and Internet browsing.

Precision that gives you an edge

The PAW3311 sensor provides accurate motion tracking, regardless of how fast you move the mouse. Every gesture, from delicate corrections to faster cursor movements, goes where you want it to. This kind of precision will work great for both demanding and casual games, and even during daily study and work.

Everyday comfort

The shape of the mouse was designed to perfectly fit both Palm and Claw grip. In addition (in wired mode), we used a lightweight Paracord cable that minimizes resistance and makes it easier to move freely on the mouse pad. Top-of-the-line glass glides to minimize friction and optimal weight make every movement smooth and enjoyable, and long hours of work won’t strain your hand.

Three modes of operation

Wireless or wired? Gaming or casual? The Zircon 880 1K is ready for any scenario. Need a quick connection with a new device? Choose Bluetooth mode. Best performance without a cable? Connect the USB receiver to your computer. Don’t want to stop playing but the battery is running low? Use a cable. With Zircon 880 1K, any scenario is possible.

Reliable click, full reliability

Optimally selected Kailh switches guarantee a fast and perceptible click that does not disappoint during everyday tasks. In addition, their lifespan is up to 150 million clicks. This gives you the assurance of comfortable and trouble-free use of the mouse for a really long time.

One charge - many hours of operation

The Zircon 880 1K mouse is equipped with a 500 mAh battery. Such capacity guarantees that after each charge it will be ready to work for many, many hours. And you? You enjoy the game. No cables, no worries.

Match the mouse to you

The mouse works with intuitive software, allowing you to configure basic sensor and button settings. This allows you to tailor the hardware to your needs and enjoy a comfortable computing experience by creating your own macros and advanced settings.

Everything you need in the kit

The Zircon 880 1K works straightforwardly when connected with a Paracord cable, and in the box you’ll also find practical extras to make everyday use easier - Grip Tape for self-assembly and spare PTFE sliders. This makes the mouse ready to go from the first use and allows you to adjust the grip and movement to your preference.
