ONIKUMA DM06 Mouse

The ONIKUMA DM06 is a modern gaming mouse designed for gamers who demand freedom of movement and precise control. The model offers three connection modes—2.4 GHz wireless, Bluetooth, and wired via USB-C—so you can easily adapt it to your needs. A sensor with DPI adjustment ranging from 800 to 12,800, a 1,000 Hz polling rate, and a high-capacity 500 mAh battery ensure smooth and responsive performance during both fast-paced gameplay and everyday use. The package is rounded out by eye-catching RGB lighting, an ergonomic design, and a wireless range of up to 10 meters.

Three connection modes for maximum flexibility

The ONIKUMA DM06 features three different connection modes, making it suitable for a wide range of applications. You can use a fast 2.4 GHz wireless connection with the included USB receiver, connect the mouse via Bluetooth, or use it in wired mode with a USB-C cable. This solution allows you to easily switch between devices and adapt your workflow to the current situation. Regardless of

the selected mode, you can count on a stable connection and comfort during everyday computer use.

Precise Sensor and DPI Adjustment up to 12,800

The mouse is equipped with a gaming sensor that allows you to adjust the sensitivity to your individual preferences. Six DPI levels are available as standard: 800, 1600, 2400, 3200, 6400, and 12,800, allowing you to quickly adjust cursor speed depending on the type of game or task at hand. The wide range of adjustment makes the device ideal for both precise aiming and dynamic movements requiring fast reaction times. The ability to customize settings enhances user comfort and allows you to better tailor the mouse to your own playing style.

1000 Hz polling rate for smooth response

The high 1000 Hz polling rate means the mouse sends information to the computer up to a thousand times per second. This makes cursor movements smoother and minimizes lag. This is particularly important during online gaming, where quick reactions and the precision of every movement matter. These specifications help you maintain full control over the game and enhance comfort during intensive use.

Ergonomic design that fits the hand

The DM06 model was designed for comfortable use over many hours. Its contoured shape fits comfortably in the hand, reducing fatigue during long gaming sessions or while working at the computer. Strategically placed buttons provide quick access to key functions, while the side surfaces improve grip. As a result, the mouse ensures comfortable use regardless of how intensively it's used.

Eye-Catching RGB Backlighting

The RGB backlighting gives the device a modern, gaming-inspired look and makes your computer setup even more attractive. The illuminated elements on the casing highlight the mouse's dynamic design and create an interesting visual effect during use. The lighting blends perfectly with other gaming accessories, creating a cohesive look for the gamer's setup. This solution combines aesthetics with the modern style of computer hardware.

500 mAh Battery and USB-C Charging

The built-in 500 mAh battery allows you to use the mouse without having to recharge it frequently. The modern USB-C connector makes recharging convenient and fast, and the cable itself can also be used for wired operation. This means you don't have to interrupt your gaming or work even while charging. The combination of wireless freedom and the option for wired use enhances the device's functionality and provides greater flexibility in everyday use.

Wide Compatibility with Windows Systems

The ONIKUMA DM06 is designed to work seamlessly with many versions of Windows. The mouse supports both older systems, such as Windows XP, and newer versions like Windows 7, Windows 8, Windows 10, and Windows 11. This makes it ideal for both upgrading an older computer setup and for modern gaming rigs. Its broad compatibility lets you quickly get to work or start gaming without the need for complicated setup.

Included in the package

- ONIKUMA DM06 gaming mouse
- 2.4 GHz USB receiver
- 1.5 m USB-A to USB-C cable
- User manual
