ONIKUMA DM01 Wireless Mouse (White)

The ONIKUMA DM01 gaming mouse supports wireless operation on the 2.4 GHz band and via Bluetooth, as well as wired connection using a 1.5-meter USB-C cable. The model offers 6 sensitivity levels ranging from 800 to 12,800 DPI, a 1,000 Hz polling rate, a wireless range of approximately 10 meters, and a 500 mAh battery providing up to approximately 50 hours of use. Its lightweight design, additional side buttons, and included anti-slip stickers allow you to tailor the mouse to dynamic gameplay and everyday use.

6 DPI levels—from precision to fast movements

The ONIKUMA DM01 lets you switch between six sensitivity levels: 800, 1,200, 2,400, 3,600, 6,400, and 12,800 DPI. Lower settings make it easier to perform precise movements, while higher settings allow you to move the cursor quickly with just a slight hand movement. This adjustability makes it easy to tailor the sensitivity to both the type of game and the tasks you're performing on your—

computer.

1,000 Hz for Fast Communication with the Computer

A reporting rate of 1,000 Hz means the mouse can send its position information to the computer up to 1,000 times per second. This ensures smooth cursor response to hand movements and minimizes lag, which is especially important in fast-paced games. This feature is useful wherever smooth and precise control is essential.

2.4 GHz Connectivity and Wired Mode

The included USB receiver is used for a wireless connection to the computer, and the advertised transmission range is approximately 10 meters. Additionally, the device connects via Bluetooth. The mouse can also be used in wired mode using the included 1.5-meter USB-C cable, which provides greater flexibility when using the device. The DM01 is compatible with Windows 98, 2000, ME, NT, XP, Windows 7, Windows 8, Windows 10, and Windows 11.

500 mAh Battery and Lightweight Design

According to the manufacturer, the built-in 500 mAh battery provides approximately 50 hours of continuous use, and it takes about 4 hours to charge. This allows you to use wireless mode for extended periods without having to frequently connect the cable. The low weight facilitates quick movements and keeps the mouse feeling light during longer computer sessions.

Non-slip stickers for a more secure grip

The set includes textured anti-slip grip tape stickers that can be applied to selected parts of the mouse shell. Their texture increases the grip of your fingers on the mouse, which can provide a more secure hold and better control during intense gameplay. At the same time, the distinctive white, blue, and red patterns allow you to personalize the device's appearance.
