ONIKUMA DM08 Wireless Mouse (black)

The ONIKUMA DM08 is a lightweight gaming mouse equipped with a PAW3311 sensor, adjustable sensitivity up to 24,000 DPI, and a refresh rate of up to 1,000 Hz. The model offers three operating modes, including a wired connection via USB-C, 2.4 GHz wireless, and Bluetooth, and the built-in battery has a capacity of 500 mAh. The mouse weighs 68 g (± 5 g), features a built-in display showing key performance metrics, and comes with a magnetic charging dock with RGB backlighting. The ergonomically contoured design is adapted to various grip styles, making the DM08 ideal for both gaming and everyday computer use.

Sensitivity Adjustment up to 24,000 DPI

The PAW3311 sensor allows you to adjust the mouse's sensitivity to the type of game, monitor resolution, and your personal preferences. The ONIKUMA DM08 offers 6 DPI adjustment levels, while the value can be set as high as 24,000 DPI using the dedicated driver. Lower sensitivity makes it

easier to perform precise movements, while higher sensitivity allows you to move the cursor across the screen more quickly.

Refresh rate up to 1,000 Hz

The ONIKUMA DM08 supports a refresh rate of up to 1,000 Hz, allowing mouse movement data to be transmitted to the computer at a high frequency. This helps ensure smooth and responsive control, which is particularly useful during fast-paced games that require quick reactions. Dedicated software also allows you to configure operating parameters and assign functions to individual buttons.

Built-in display showing mouse status

On the back of the ONIKUMA DM08 is a small display that allows you to control key settings directly on the device. The screen displays information about the selected DPI level, refresh rate, battery status, and current connection mode. This allows users to quickly check basic operating parameters without having to open the software on their computer every time.

Magnetic Charging Station with RGB Backlighting

The 500 mAh battery can be recharged using the included magnetic charging station, which makes it easy to place the mouse on the station to charge after finishing work or a game. The magnetic connection with contacts allows you to conveniently place the device on the base without having to connect a cable directly to the mouse each time. The station also features adjustable RGB backlighting, making it an additional visual element of your computer setup.

Lightweight and Ergonomic Design

The ONIKUMA DM08 weighs 68 g (± 5 g), which facilitates smooth, rapid movements and reduces strain on the hand during extended use. The body profile is designed for users with medium to large hands and supports palm grip, claw grip, and finger grip styles. The wireless transmission range is approximately 10 meters, and the ability to choose between different connection modes allows you to tailor the mouse's usage to your current needs.

Included in the set
