ONIKUMA DM09 Wireless Mouse (Black)

The ONIKUMA DM09 wireless mouse is a gaming model equipped with a PAW3311 sensor, adjustable sensitivity up to 24,000 DPI, a refresh rate of up to 1,000 Hz, and a 600 mAh battery. The device can operate in three modes: 2.4 GHz wireless with a USB receiver, Bluetooth wireless, and wired via a USB-C cable, allowing you to choose the connection method that best suits your current needs. The mouse also features RGB lighting, a magnetic charging dock with light effects, and a lightweight, open-frame design weighing 69 g (± 5 g).

Adjustable sensitivity up to 24,000 DPI

The ONIKUMA DM09 allows you to adjust the cursor speed to suit the type of game, the tasks at hand, and your personal preferences. Using the dedicated software, you can set one of 6 DPI levels, with the available adjustment range ranging from 800 to 24,000 DPI. This allows you to conveniently switch between settings optimized for precise movements and high sensitivity, which is useful during

fast-paced gameplay.

Refresh rate up to 1,000 Hz

In wired mode, the ONIKUMA DM09 supports a 1,000 Hz refresh rate, allowing mouse movement data to be transmitted to the computer at a high frequency. When connected via 2.4 GHz, refresh rates of 125, 250, 500, and 1000 Hz are available, allowing you to customize this setting to your preferences. A high refresh rate promotes smooth and responsive control, which is especially useful in games that require quick reactions.

Three Connection Modes

The DM09 supports a 2.4 GHz connection via a USB receiver, Bluetooth mode, or a wired USB-C connection, providing greater flexibility for everyday use. The advertised wireless range is approximately 10 meters, so you don't have to stay right next to your computer. Wired mode, on the other hand, allows you to use the mouse even while it's charging via the cable.

Magnetic Charging Station and RGB Backlighting

The set includes a magnetic charging station where you can place the mouse when you're done using the computer. The built-in battery has a capacity of 600 mAh, and the USB-C interface also allows you to connect a cable. Both the mouse and the dock feature multicolor RGB lighting, and the ability to switch between lighting effects lets you customize the device's appearance to match the rest of your setup.

Included in the set

- ONIKUMA DM09 wireless mouse
- RGB magnetic charging station
- 2.4 GHz USB receiver
- USB-A to USB-C cable
- User Manual
