ONIKUMA G52 Gaming Keyboard (Black)

The ONIKUMA G52 gaming keyboard is a compact mechanical model featuring 82 keys, RGB backlighting, hot-swappable switches, and a multimedia dial. The layout takes up about 75% of the space of a full-size keyboard, which saves desk space and leaves more room for comfortable mouse movement. The model uses a wired USB Type-C connection, and the package includes a detachable 1.8-meter PVC cable.

Mechanical Switches with Hot-Swap Functionality

The ONIKUMA G52 uses mechanical switches that provide a distinct and consistent response while typing and gaming. The Hot-Swap design allows you to remove and replace switches without soldering, making it easier to customize the keyboard's characteristics to your preferences. The

declared key lifespan is up to 50 million cycles, and the switch actuation force is 50 ± 10 gf.

Compact 82-key layout

The 82-key layout keeps the keyboard's dimensions to approximately $327 \times 136 \times 39$ mm, making this model well-suited for workstations with limited space. Despite its compact design, users still have access to the F1-F12 function keys, arrow keys, and additional control buttons, among other features. The keyboard also supports full anti-ghosting, which ensures accurate registration of multiple simultaneous keystrokes—a feature particularly useful during fast-paced gaming.

RGB Backlighting

The built-in RGB backlighting gives the keyboard a gaming-inspired look and complements the key colors well. The backlighting also improves the visibility of individual keys in low-light conditions. As a result, the ONIKUMA G52 can be a functional yet eye-catching addition to your gaming setup and everyday use.

Audio Control Knob

In the upper-right corner of the ONIKUMA G52, there's a multimedia dial that provides quick access to basic audio controls. By turning it left or right, you can lower or raise the volume, respectively, without having to go into the system settings. Pressing the knob mutes or unmutes the sound, which is useful whether you're gaming, watching movies, or listening to music.

Detachable USB Type-C Cable

The ONIKUMA G52 uses a wired USB Type-C connection, so it doesn't require battery charging or wireless pairing with a computer. The set includes a detachable 1.8-meter cable made of durable PVC, providing a convenient range when setting up your computer station. The detachable cable also makes it easier to store and transport the keyboard and helps reduce the risk of cable damage during transport.

Included in the set
