The P34A60 is an affordable storage solution that doesn't skimp on performance. It's designed for novice users, DIY system builders, purpose-built system manufacturers, and simply those who are looking to upgrade their PC. But with a PCIe Gen3x4 interface, which means four lanes are used for transmitting and receiving data simultaneously, read speeds up to 2,200 MB/s, and write speeds up to 1,600 MB/s, this SSD is anything but basic.
