R1,363

The Kensington MY230 EQ mouse is designed for versatility and comfort, featuring a sleek and eco-friendly construction made from 31% post-consumer recycled plastic. This rechargeable mouse offers wireless connectivity through both 2.4 GHz and Bluetooth 5.0 interfaces, facilitating connections to multiple devices simultaneously. The movement resolution of 1200 DPI ensures precise tracking whether used for work or play, and its right- and left-handed orientation accommodates all users. Customizable buttons allow users to tailor the mouse to personal preferences and workflows, enhancing productivity. The silent switches provide a quiet clicking sound, creating a discreet working environment. An LED indicator offers clear visual feedback on connectivity status, while the included USB-C to USB-A cable and nano receiver enhance convenience. With a wide operating temperature range and the ability to handle high humidity, the MY230 EQ mouse is built to perform in various environments.
