driven fan control keeps your device cool, reducing temperature and noise. Plus, the power optimization feature enhances energy efficiency.

Enhanced Productivity

The ThinkCentre M70s Gen 5 desktop is a powerhouse of productivity powered by up to 14th Gen Intel® Core™ processor with Intel vPro® Enterprise to accomplish more with less effort. Unlock boundless creativity with integrated Intel® graphics. Plus, this small form factor handles complex data operations with ease thanks to ample memory and storage.

Unmatched Security

Protect your data and business with ThinkShield, our comprehensive suite of security solutions, featuring the discrete Trusted Platform Module (dTPM) to safeguard critical data with encryption. Physical security is reinforced with Kensington Security Slot™, chassis e-locks, and more, offering unparalleled security.

Multitasking Flexibility

The ThinkCentre M70s Gen 5 makes multitasking a breeze with multiple ports and expansion slots. Connect your tablets and laptops through Smart Cable. This intelligent feature offers cutting-edge device collaboration through convenient USB-A and USB-C connections, accommodating all your peripherals, including laptops and tablets. Seamlessly share device control, data, and screen projection between devices.

Flexibilitet för multitasking

The ThinkCentre M70s desktop PC uses 90% post-industry content (PIC) recycled materials expanded polyethylene (EPE) cushion, 60% post-consumer content (PCC) recycled plastic, 30% ocean-bound plastic (OBP) thermal shell and 30% OBP bag and Forest Stewardship Council® (FSC) certified carton in packaging. The chassis uses 85% PCC acrylonitrile butadiene styrene (ABS)
