Graphic Tablet Huion HS610

The Huion HS610 is a graphics tablet with a working area of 254 x 158.8 mm and a thickness of just 8 mm. Its advantage is compatibility with Windows, macOS, Linux and Android. The model features the PW100 wireless stylus, which works on the basis of electromagnetic resonance technology, recognizes 8192 levels of pressure and supports tilt up to ±60°. The device is also distinguished by the presence of a touch ring and a set of programmable buttons that allow you to customize its operation.

Smoothness and precision

The Huion PW100 stylus works on the basis of electromagnetic resonance technology, so it does not require batteries or charging. Support for as many as 8192 levels of pressure enables subtle shading and precise differentiation of line thickness. The device's response to pressure is instantaneous, so you can enjoy full control over your drawing and get natural, dynamic effects without delay. The device also supports ±60° tilt, which, depending on the software you are using, allows you to

achieve varied lines and a natural tool guiding effect.

Functionality that speeds up work

The tablet is equipped with a touch ring, which allows you to smoothly zoom in and out or change the size of the brush. At your disposal will be a total of 28 programmable buttons, of which 12 are physical buttons on the case and 16 are programmable multimedia keys.

Comfort of use

The handle of the stylus has been coated with silicone, which prevents your hand from slipping and ensures a firm grip even during prolonged work. The side button defaults to the right click of the mouse, and the other to the eraser. Thanks to its lightweight design (16 g) and lack of charging, the stylus is great for prolonged work

Android support - draw on your phone as well

The Huion HS610 can be used not only with a computer, but also with Android smartphones (6.0 or later) when connected via an OTG adapter. The solution used gives you the freedom to work on the go or in the field - just plug in the device and run the graphics application.

Cooperation with many applications

The device works with popular graphics programs, such as Photoshop, Illustrator, Krita, GIMP, Clip Studio Paint or SAI. So you can use it both for professional work and for studying or developing passions. The tablet ensures smooth operation in any of these environments - without the need to install additional drivers when working with Android.
