Colmi V89 Smartwatch (Gold)

The Colmi V89 is a watch that combines an elegant design with a wide range of features useful both in everyday life and during workouts. With its slim case, crisp AMOLED display, and comprehensive health and activity tracking options, it's perfect for anyone looking for a comfortable and practical device.

A Slim Design and a Display That Makes a Difference

The Colmi V89 was designed with comfort and aesthetics in mind. Its case is just 7.9 mm thick, so it lies flat against the wrist and looks great. In addition, the 1.43-inch AMOLED screen with a high resolution of 466 × 466 delivers vivid colors and convenient access to notifications—regardless of lighting conditions. Plus, the available watch face designs let you personalize the watch's appearance.

Health Monitoring

The Colmi V89 offers a suite of health features that help you better understand what's happening in your body throughout the day. The watch continuously monitors your heart rate and also lets you track your stress levels. Built-in algorithms analyze sleep quality, which can help improve your circadian rhythm and recovery. For women, there's a special feature for tracking the menstrual cycle, ovulation, and reminders. All data is available in the app.

Over 100 sports modes—designed for active people

The smartwatch supports over 100 different sports—from walking and running to cycling, strength training, and yoga. The device tracks activity duration, distance, step count, and calories burned. The watch can accompany you during workouts outdoors, at the gym, and at home, providing clear data along the way.

Access to Calls and Messages

The watch lets you make and receive phone calls thanks to a Bluetooth connection to your phone. You can answer, reject, and make calls, as well as view your call history without reaching for your smartphone. Notifications from apps such as SMS, WeChat, WhatsApp, and the calendar also appear on the screen. A rotating crown is used to navigate the menu, which makes operation much easier.

Durable Design

The Colmi V89 smartwatch lasts about 4–7 days with heavy use and up to 15 days in standby mode. The watch is also splash-resistant—rain, sweat, or washing your hands are no problem for it. A built-in sealing ring protects against moisture, allowing you to use it in everyday situations without worrying about damage.

Everything at Your Fingertips—Everyday Features and Extras

The Colmi V89 isn't limited to just sports and health features. You also have access to an alarm, stopwatch, timer, calculator, water intake reminders, smartphone camera control, and a smartphone finder feature. The variety of available features makes this watch a practical everyday companion.
