R3,845

RGB gaming headset with Hi-Res ESS Quad-DAC, circular RGB lighting effect and USB-C connector for PCs, consoles and mobile gaming

Clarity for the Win

ROG Delta is the world's first gaming headset with the industry-leading, hi-fi-grade ESS 9218 quad DAC, which delivers impeccably clear and detailed sound to give serious gamers the edge they need to win. ROG Delta features a USB-C connector and comes with a USB-C to USB 2.0 adapter to let you game on your PC, console and mobile device without changing headsets. A one-of-a-kind, circular rainbow RGB lighting effect provides a stylish look to set you apart on the battlefield.

Ultimate Immersion for Pro Gamers

Hear Every Detail

Hi-Resolution ESS ES9218 SABRE Quad-DAC

Some people say there is no good sounding gaming headset. Those people have not heard ROG Delta. The hi-fi-grade ESS 9218 Quad-DAC provides lossless audio processing with each DAC devoting its processing power to a subset of the audible frequency range, from lows, mids, highs to ultra-highs. The four signals are then combined, which produces clearer sound with an impressive 127-dB SNR that's much higher than any device in the market. As a result, you can hear and place in-game sounds with pinpoint accuracy, letting you precisely judge enemy distance, direction of footsteps, gunshot locations and more. Hear every detail and enjoy crisp, clear sound for a true-to-life audio experience.

Exclusive Hyper-Grounding Technology

Hyper-Grounding is ROG's exclusive technology, which utilizes a multi-layer PCB and a special layout design to prevent electromagnetic interference, resulting in pure, noise-free audio. Due to this innovative technology, ROG Delta is the world's first gaming headset with RGB lighting that is able to include an ESS Quad DAC and unlock its full potential to provide gamers rich, powerful sound unmatched by other gaming headsets.

High SNR in FPS Games

Signal to noise ratio is a critical specification for gaming headsets, especially in FPS games. A higher SNR allows you to precisely pinpoint the origin of enemy footsteps, or hone in on the location of gunfire or explosions on battlefield. With its quad-DAC design, ROG Delta is capable of achieving an unprecedented signal-to-noise ratio of 127 dB, a level untouchable by single-DAC gaming headsets.

Crystal-Clear Highs and Punchy Bass

Audio Signal Diversion Technology

With ROG Delta, the exclusive ASUS Essence drivers have been updated with Audio Signal Diversion technology, giving them a circular wall that helps separate high, low and medium frequency sounds, reducing interference between frequency ranges for purer and clearer audio. Additionally, the drivers feature a wide frequency response of 20Hz-40kHz to provide incredibly strong bass and optimized gaming sound, so you'll hear every detail while enjoying an all-around immersive acoustic experience.

Style at Your Command

Exclusive Circular Rainbow RGB Lighting

Show your style with customizable Aura RGB lighting. ROG Delta leaves single-color lighting behind as the world's first gaming headset to feature rainbow circular RGB lighting. This captivating effect features seven independent lighting zones with dazzling multicolor cycling displays. Choose from over 16.8 million color combinations and six preset lighting effects.

ASUS Aura Sync Technology

ROG Delta features ASUS Aura Sync technology, allowing you to synchronize lighting effects across Aura-enabled products* to create a unique and captivating gaming atmosphere.

One Headset is All You Need

Multiplatform Compatibility

Instead of a 3.5mm connector, ROG Delta features a USB-C connector and an comes with a USB-C to USB 2.0 (Type-A) adapter, which allows it to connect with nearly every gaming platform, including PCs, consoles and mobile devices, letting you enjoy its class-leading performance, anytime, anywhere.

Crafted for Comfort

Ergonomic D-shaped Ear Cup

ROG Delta has ergonomic, D-shaped ear cups that more closely match the shape of human ears compared to oval ear cups, reducing the unnecessary contact area by 20% for a better, more comfortable fit, especially when the headset is worn for long periods.

comfortable fit, especially when the headset is worn for long periods.

Two Types of Fit and Feel

ROG Delta provides two types of fit and feel for you to choose from based on your needs or preference. ROG Hybrid ear cushions, which combine protein leather and fabric mesh, are thicker, more breathable and provide a contoured fit, perfect for long gaming sessions. The protein leather cushions are comparatively thinner and softer, making them good for on-the-go use.

Instant Control at Your Fingertips

Intuitive control buttons on the ear cup let you instantly control volume and RGB lighting, and a durable rocker switch lets you easily mute the microphone during gameplay.

Clear Communication

ROG Delta comes with a detachable, unidirectional boom microphone, tuned especially for clear voice communication. An indicator on the tip of the boom flashes red when the microphone is muted, letting you easily see the microphone's status.

ROG Armoury Software

ROG Armoury II is driver-based software that offers extensive controls and an intuitive UI so you can easily tune ROG Delta to play your way. Create profiles, customize colors and lighting effects, and most importantly, to take full control over your audio experience, from equalization (EQ) to 7.1-speaker level-balancing. You can even create and apply audio profiles for different scenarios with ease.
