

Seagate Constellation .2 internal hard drive 500 GB 7200 RPM 64 MB 2.5" SAS

Model: ST9500620SS

Manufacturer: SEAGATE

Product Code: 11947

R2,268 ~~R2,428~~

Seagate Constellation.2 - drives are the most energy efficient enterprise drives on the market. Designed for enterprise robustness, Constellation.2 is available in capacities up to 1TB and offers reliable storage for high capacity servers and storage arrays in a minimal footprint.

Key Features and Benefits:

- Industry's first 2.5-inch 500 GB capacity-optimized drive for dense, space-constrained data centers allows you to store twice as much data in the same footprint.
- Build highly efficient bulk storage solutions while lowering your power consumption costs
- Designed for robust 24x7 operation with a 1.4M hour mean-time-between-failure (MTBF) rating
- Best-in-class rotational vibration tolerance ensures unrivaled performance in high spindle-density applications, and multi-drive firmware maximizes system availability
- Choose from 6Gb/s SAS with improved data integrity, scalability and fastest data access or SATA

6Gb/s for economical 7200-RPM performance
