Product Code: 1195344

R2,573

It is officially “game on” with the Conceptronic KRONIC Mechanical Gaming Keyboard.
This precision keyboard is designed for gaming at the highest level. Each key is fully mechanical, providing true simultaneous action and a high level of tactile feedback including an audible “click” report on each keystroke. Anti-ghosting functionality prevents any keystroke conflicts even in the most intense battle scenarios, making every keystroke precise and accurate. 8 programmable macro keys easily assign powerful actions, key remaps and combos, ensuring that complex commands work fast and accurately. Choose from 10+ different color modes across the LED backlighting, as well as adjusting brightness and breathing speed – or simply turn the LED lighting off when desired. This 1.8m braided cable with a gold-plated USB connector ensures reliable connectivity and greater

durability. Suitable for any USB deployment.

The keyboard also switches to a full multimedia key combination when necessary, providing real work functionality for business hours. With a strong aluminum alloy plate for absorbing all sorts of gaming punishment, this is a precise, sophisticated and durable keyboard for getting the absolute most out of work and play.
