

Ugreen DXP480T Plus NAS Desktop Intel® Core™ i5 8 GB DDR5 Grey

Model: 25892B

Manufacturer: UGREEN

EAN: 6941876267484

Product Code: 1196771

R19,041

All-Flash NAS Engineered for Creators: You will experience instant file access and faster reads and writes with this SSD-only powerhouse especially while you are editing video. Meanwhile, just move away from data scattered across devices. The UGREEN NAS DXP480T Plus can serve as go-to platform to securely and conveniently store any type of data with comprehensive and intuitive file access and management tools.

10GbE Network Port & Wi-Fi 6: With a 10GbE network port that reaches peak speeds of 1250MB/s, you can download large videos and pictures smoothly like a breeze. With the built-in Wi-Fi 6 function, you can achieve wireless connection anytime and anywhere.

Unparalleled Processing Performance: With a 12th Gen, 10-core 12-thread Intel Core i5 Processor, processing performance is improved by leaps and bounds compared to previous processors.

All-Flash, 32TB Massive Data Storage: Equipped with four M.2 NVMe slots for SSD, this all-flash NASync offers blazing fast read/write speed and has a maximum storage capacity of up to 32TB. And supports JBOD/Basic/RAID0/RAID1/RAID5/RAID6/RAID10 RAID levels. Store thousands of HD movies, pictures, and documents, Making NASync a movie library, photo album, and file storage space all in one.

One, All-Inclusive App: Rather than downloading individual applications for specific functions, the NAS App incorporates these functions into one place. Access Storage Manager, Files, Photos, and more, all from one convenient location. (Please follow the instructions to upgrade the firmware for a better experience.)

Professional Data Security: Compared with cloud drives, NASync allows users to store massive personal data in trusted local devices, preventing leakage and surveillance to the greatest extent. Data transmission and accounts can be fully protected with professional encryption and multi-factor authentication.
