KeySonic KSK-8040U-CR keyboard Home/Office USB Black

Model: 61081

Manufacturer: KEYSONIC

EAN: 4250078174141

Product Code: 1198788

R1,672

Beyond Typing

Think of a keyboard that goes beyond everyday typing. It is not only convenient to type on, but also acts as a reliable gatekeeper when you use its integrated smart card reader. Smart cards become essential for secure transactions, such as banking and accessing online government services. Its true strength comes to light when you engage its smart card reader, allowing it to become a vigilant protector of your sensitive data.

Enhanced Security with Smart Card Integration

Consider a workspace where your keyboard actively contributes to your security. With an integrated smart card reader, your keyboard becomes more than just a tool for typing. It becomes a part of your security strategy, safeguarding your online transactions seamlessly.

High-Speed Card Reading

Secure and speed up your access with the powerful smart card reader in your keyboard. Capable of processing data at 420 kbps and supporting both T0 and T1 protocols, guaranteeing that each login or transaction is addressed with an exceptional pace and dependability.

Robust Build

Reliable Performance

Tailored for durability. With membrane key switches designed to withstand over 10 million keystrokes, making it highly durable for your high demanding tasks. It’s the reliable choice for professionals who need their tools to perform day in, day out, in any environment.
