be quiet! Pure Loop 2 FX 240mm Processor All-in-one liquid cooler 12 cm Black 1 pc(s)

Model: BW013

Manufacturer: BE QUIET!

EAN: 4260052189023

Product Code: 1207316

R2,401

Impressive illumination, superior cooling

Pure Loop 2 FX 240mm is the very high-performing and silent All-in-One water cooling unit with impressive ARGB illumination. Its black design with ARGB illumination makes Pure Loop 2 FX 240mm a highlight in any case. The newly built PWM pump with increased performance offers a silent operation. Having an included coolant bottle in the scope of delivery, Pure Loop 2 FX 240mm underlines its claim to be the first choice for design-orientated users.

VERY HIGH COOLING PERFORMANCE

Reliable cooling power for sophisticated applications

With Pure Loop 2 FX 240mm even demanding applications can be used reliably. A very high cooling power provides low temperatures even during periods of peak CPU performance. Pure Loop 2 FX 240mm is the water cooling solution of choice for all mainstream CPUs.

FANS DEVELOPED FOR RADIATORS

Fan blades optimized for high pressure

With a remarkably high air pressure of up to 2.6mm /H2O, Light Wings 120mm PWM high-speed is the best choice for Pure Loop 2 FX 240mm. The 9 airflow-optimized fan blades provide enough air pressure to make this fan perfect, even in demanding configurations.

IMPRESSIVE ILLUMINATION, NEAT DESIGN

Lots of illumination possibilities

2 Light Wings PWM high-speed offer ARGB lighting at the front and rear. 18 ARGB LEDs give you many opportunities to individualize your PC build. This and the illuminated cooling block make Pure Loop 2 FX 240mm a highlight in any system.

DOUBLY DECOUPLED PWM-PUMP

Adjustable and silent operation

The doubly decoupled PWM-pump runs smoothly and silent. Due to the PWM control the pump speed can be adjusted for silent as well as powerful operations. Thanks to the effective damping the pump causes even less noise and minimal vibration. This is the key to provide the well-known silent be quiet! operation.

ONE HUB, MANY POSSIBILITIES

Synchronization of up to 6 ARGB-components

The ARGB-PWM-Hub enables synchronization of up to 6 PWM fans and 6 ARGB components. This allows the user to run all your cooling and lighting gear with just one PWM and one ARGB header on your motherboard. It can be positioned everywhere inside the case and by that supports a neat interior and cable management.

EASY TO REFILL

For a long lifespan

The refill port is easy to access which makes refilling safe and comfortable. The coolant bottle included in scope of delivery makes it easy to achieve a long lifespan.
