Sturdy and versatile

The IB-NH300 notebook holder is carefully and very solidly made. The entire holder is made of high-quality aluminium. The design is adapted to the requirements of comfortable working, so that versatile adjustment options promote fatigue-free working.

Adjustable in two planes

The IB-NH300’s smooth-running joints, which are arranged in two planes, allow the user to adjust the angle and height of the notebook ideally to suit personal needs. Two degrees of freedom of angle adjustment offer an enormous number of possibilities to achieve an ergonomic posture.

Non-slip and well ventilated

Thanks to the IB-NH300’s generously perforated shelf, a resting notebook is given enough air to breathe even during long periods of operation. Equally useful are the two long silicone strips on the top and bottom edges, which effectively prevent the notebook from slipping.
