

ARCTIC Liquid Freezer WS360- SP6 Processor Liquid cooling kit 12 cm Black 1 pc(s)

Model: ACFRE00201A

Manufacturer: ARCTIC

EAN: 4895265000843

Product Code: 1210425

R3,672

Liquid Freezer WS360-SP6

Workstation All-in-One CPU Water Cooler

Outstanding Liquid Cooling for Workstations

The Liquid Freezer WS360-SP6 is an all-in-one liquid cooling solution designed for the AMD SP6 workstation platform. Featuring a specially mounting system for easy installation, it delivers outstanding cooling performance to meet the demands of high-performance workstations.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Designed for Superior Cooling, optimized for Workstations

Thanks to its radiator design and high-performance fans, the Liquid Freezer WS360-SP6 delivers outstanding cooling under heavy loads while keeping noise levels comparable to competing solutions.

P12 Pro PST CO - Performance & Durability

The ARCTIC's P12 Pro PST CO pair the High Static-Pressure Performance of the P12 Pro with Dual Ball Bearings engineered for continuous 24/7 operation, ensuring durability and extended lifespan.

Tailored Made for SP6

A fixed mounting system tailored for AMD SP6 ensures optimal contact pressure on the CPU and user-friendly installation.

Water Block Design for Workstations

The water block is a brand-new design with high-density micro-fins, efficient chamber flow, and a durable pump for long-lasting reliability.

Premium-Class Radiator

Liquid coolers with 38mm radiators offer superior thermal dissipation, and we continued integrating this design into our workstation models.

High Quality EPDM Tubing

EPDM tubing with braided sheathing to ensure durability and prevent leakage, protecting your components is our highest priority.
