It delivers next-level computing that strikes a perfect balance between sustainability and performance.

Versatile Connectivity

The Lenovo ThinkCentre M70t Gen 5 desktop is engineered to effortlessly handle multitasking needs. With robust connectivity and ample storage options it makes an ideal centerpiece to your workflow. Plus, the optional Smart Cable feature transforms the data sharing and collaboration, making screen projection and device control easier.

Unprecedented Performance

Fueled by up to a 14th Gen Intel® Core™ processor with Intel vPro® Enterprise, the ThinkCentre M70t Gen 5 desktop is a powerhouse of performance and efficiency. The innovative chip-level AI features optimize CPU performance, fan speed, and energy consumption.

Digital Defence Ensured

Protect your data and business with ThinkShield, our comprehensive suite of security solutions, featuring the discrete Trusted Platform Module (dTPM) to safeguard critical data with encryption. Physical security is reinforced with Kensington™ Lock slots, chassis e-locks, and more, offering unparalleled security.

Championing Sustainability

At Lenovo, we are committed to sustainability and we actively take initiatives to lessen environmental footprint. The ThinkCentre M70t Gen 5 desktop uses 85% post-consumer content (PCC) recycled plastic, Acrylonitrile butadiene styrene (ABS) in chassis. Plus, packaging relies on 30% ocean-bound plastic (OBP) thermal shell and 30% OBP bag.
