R10,218

The ProLite T1721MSC-B3 is a versatile 17” touchscreen monitor designed for smooth, accurate and reliable interaction. Its 10-point PCAP touch technology supports operation by finger, latex glove or compatible stylus, making it well suited to retail, hospitality, education and industrial environments. A protective glass overlay enhances durability and scratch resistance while preserving clear image quality and consistent touch performance. This makes the monitor a dependable choice for applications where the screen is used frequently throughout the day. The IPX3-rated front provides

protection against water sprays from different directions at angles of up to 60°, offering added reassurance in environments where occasional exposure to moisture may occur. The stable stand features an 70° tilt range, allowing the screen to be positioned comfortably for different users and applications. Integrated 2 x 2W speakers deliver clear sound directly from the monitor, making the ProLite T1721MSC-B3 a practical and complete touchscreen solution for a wide range of professional settings.
