ONIKUMA G80 Gaming Keyboard

The ONIKUMA G80 is a multifunctional gaming keyboard that combines cutting-edge technology with a colorful, eye-catching design. It offers a layout with 94 keys and three connectivity modes - Bluetooth 5.0, 2.4 GHz band and wired (via USB-C). It is also distinguished by a long operating time, a functional multimedia dial and a built-in OLED (Organic Light Emitting Diode, a high-contrast, low-power consumption LED display) screen. All this makes the G80 perfect not only for gaming, but also for work and everyday use!

Three connection modes

The ONIKUMA G80 keyboard offers the flexibility that the modern gamer expects. You can use it wirelessly (via Bluetooth 5.0 or in the 2.4 GHz band), and when you need maximum stability - switch to a wired USB-C connection. Switching between modes is quick and intuitive.

Dial and OLED screen for full control

The built-in control knob allows you to quickly adjust the volume or backlight brightness. What's more, the keyboard has a small OLED screen that displays information about connection mode, battery status and more. It's a solution that enhances the user experience and allows you to have everything under control.

Stylish and quiet design

Keycaps in three colors and a pastel-colored case make the ONIKUMA G80 stand out for its remarkable appearance. In addition, the membrane-based keys work exceptionally quietly, making the keyboard also perfect for the office or late-night gaming sessions. Added to this is the stylish RGB backlighting (Red Green Blue, a backlighting system based on three primary colors) with various effects.

Long working time

The built-in 2,000 mAh battery provides long working time without frequent charging. With the backlighting on, the keyboard works for up to 60 hours, and without it - up to 200 hours. When the energy runs out, simply connect the device via USB-C - it takes about 7-8 hours to fully charge.

Included

- Keyboard
- USB-A to USB-C cable
- 2.4 GHz adapter (USB-A)
- User manual
