ONIKUMA G69 Keyboard (black) (QWERTY)

The ONIKUMA G69 is a compact, 68-key keyboard designed for gamers who demand high precision and responsiveness. Equipped with RT technology with accuracy to 0.02 mm, switches with a lifespan of 50 million presses and an ultra-fast polling rate of 8000 Hz (0.125 ms), it guarantees an edge in any game. Innovative features such as dynamic calibration, full pitch customization and a closed design with soft wrist support make the G69 an e-sports-grade piece of hardware.

Precision switches and multi-layer construction

Every press is fast, smooth and accurate thanks to 3.4mm pitch switches, 37 gf activation force and finely tuned stabilizers. An internal backplane ensures rigid construction and clear, responsive feedback even under heavy use. Large keys maintain excellent balance and smooth operation.

RT technology and 8K responsiveness

With full-range RT technology with adjustable activation from 0.1 mm to 3.5 mm and 0.02 mm accuracy, you can adjust the response of each key to your preference - from a quick click to a deep stroke. Scanning at 8000 Hz and a latency of just 0.125 ms allows you to react faster than your opponent, and the lack of dead zones increases recognition accuracy.

Advanced software and full personalization

The ONIKUMA G69 offers a fully internally developed web-based driver that enables dynamic 2.0 calibration during each click and real-time customization of key action. With support for mixed switches (hot-swap), you can create a unique action profile for each key and playing style.

Compact, ergonomic and portable

The 68-key layout increases desktop space without sacrificing key features. A soft wrist rest and enclosed stand with two-stage adjustment provide comfort during long sessions. The ARGB backlighting is eye-friendly with no flicker, and the detachable cable makes the keyboard easy to carry and store.

Included

- keyboard
- USB-A to USB-C cable
- lanyard
- user manual

Manufacturer	Onikuma
Model	G69
