The silent click feature in the mouse ensures that there is minimal noise when you press the buttons. Unlike standard mice which tend to make audible clicking sounds, this mouse’s silent click mechanism is designed to operate quietly. This is especially beneficial in environments where it's important to keep noise levels down, such as offices, libraries, or shared workspaces.

Designed for both left- and right-handed users

The mouse has a symmetrical design for universal use by both left- and right-handed users. It is powered by the included 1.5 meter USB-A cable.

Made from recycled materials

At ACT, we care about the environment. That’s why we use recycled materials in our products. For example, the ABS plastic in this mouse is made from 85% recycled materials.
