ARCTIC TP-4 Premium Performance Thermal Pad

Model: ACTPD00066A

Manufacturer: ARCTIC

EAN: 4895265001284

Product Code: 1220576

R849

High Performance — Extremely Soft

The silicone-based TP-4 combines high thermal conductivity with extremely low hardness and reliably compensates for manufacturing tolerances between chips.

Safe Application

Electrically insulating, non-adhesive, and easy to handle — for safe and reliable heat transfer.

Minimizing Thermal Resistance

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The thinner the pad, the lower the thermal resistance. Depending on mounting pressure, the TP-4 can be compressed to up to 60% of its original thickness.

Bridging Uneven Surfaces

Adapts optimally to varying chip heights, air gaps, and uneven surfaces to ensure reliable contact.

Available in Various Thicknesses and Sizes

Available in 0.5 mm, 1.0 mm, and 1.5 mm thicknesses as well as multiple sizes. Can be individually cut to size if needed.

Stackable Without Performance Loss

Thanks to its low hardness and low interface resistance, multiple pads can be combined without affecting thermal transfer performance.

Versatile Applications

Ideal for RAM, chipsets, GPUs, consoles, laptops, and many other electronic components. Flexible, vibration-dampening, and easy to cut.
