Reinforced in Armor Aluminium and Corning® Gorilla® Glass Victus® 2, and engineered for water resistance, this Galaxy was designed for lasting strength.

Slim and refined

The slim design offers refined comfort and premium effortlessness.

Customised processor for Galaxy

From epic quests to real-time multiplayer, the customised processor delivers blazing speed and powers a customised image enhancer that helps content look clear and vivid.

Play longer. Stay cooler

Stay cool when the action heats up. The redesigned Vapor Chamber and tailored thermal interface material (TIM) support the high-performing customised processor during demanding sessions. By spreading heat more efficiently, they provide up to 29% enhanced heat dissipation for cooler operation.

Power up quickly

Your day, uninterrupted. Fast wired charging gets you back to full power in no time – up to 55% charge in around 30 minutes – and keeps you in your flow.

Check the specs on our powerful camera system

Powered by ProVisual Engine, the advanced 50 MP camera elevates every shot, enhancing your subjects with smarter detail, richer colour and clarity that keeps up with your imagination.

Clear and bright, even at night

Nightography lets nights shine so you can capture special moments more clearly. The advanced AP provides noise reduction based on individual noise patterns unique to each sensor type, delivering footage that feels cinematic even in low-light environments.

Super Steady Video. Even on the go

Super Steady's Horizontal Lock feature combines expanded optical angles with gyro and acceleration sensors to recognise the direction of gravity and keep your shots level, even if you rotate a full 360°.

Studio-level edits. Built in

Get quick and easy photo editing with just a few words and AI. Add objects, such as accessories on photos of your pet by naturally describing the edits you wish to make, and Galaxy AI will realise your vision in minutes.

From photos to stickers in a tap

Mix sketches or photos with text that match your imagination. With a simple text description or a rough sketch outline, Galaxy AI produces the creations. Then, add the stickers to your keyboard or share it with your friends.

Real-time suggestions when you need it

The new Now Nudge can pick up on context on your screen and prompt you with helpful shortcuts. It intelligently minimises the steps to your next action and even provides Autofill suggestions.

Privacy

On-device protection

Our Personal Data Engine gathers and processes your personal data safely. Then it encrypts that data and saves it onto your device with KEEP and Knox Vault, making it harder for anyone else to gain access.

Tailored Controls

Take control over your Galaxy AI. You decide where it gets processed, either on-device or in the cloud.

Connected Security
