How Deco Mesh Works

TP-Link Mesh Technology

Wi-Fi Dead-Zone Killer

Eliminate weak signal areas with a single Wi-Fi network that covers every corner of your home with seamless roaming, adaptive routing and self-healing. No more searching around for a stable connection, whether you're in the basement, garage or yard.

True Seamless Roaming

Deco units work together to form one unified network with a single network name. You phone or tablet automatically connects to the fastest Deco as you move through your home. The switching takes less than 0.3 second and is smooth and unnoticeable, creating a truly seamless online experience.

Adaptive Path Selection

TP-Link Mesh Technology dynamically chooses the best route and band for your connections and applications, guaranteeing a fast Wi-Fi no matter where you are in the home.

Self-Healing

If one Deco has an issue, the system will automatically reroute data via the other Decos to make sure you stay online.

Wi-Fi + Powerline

Powerline connections utilize your home's electrical circuit to link Decos, bypassing even the thickest of walls and ceilings.

The dual-band Wi-Fi and powerline work together to transmit data between Deco units. The total network speed is greatly improved compared with using Wi-Fi only.

IoT Mesh
