The biggest leap in S Pen

Weve given the S Pen a complete make over so you can enjoy a comfortable, solid grip. S Pen also has ultra low latency so there's little lag between what you think and do. It's S Pen's biggest leap in responsiveness, giving you a true writing experience. When you're done, magnetically attach it to the back of your Tab.

Control your tablet remotely

S Pen lets you snap photos, turn up the volume or change slides in a presentation, all without touching your tablet. Take control with the pre-set actions or customise the gestures and button pushes for an intuitive experience. Simply move your hand or push a button to put your tablet to work.
