

LevelOne 28-Port L3 Lite Managed Gigabit PoE Switch, 802.3af/at PoE, 24 PoE Outputs, 400W Power Budget, 4 x 10G SFP+, Dual AC Redundant Power Supply

Model: GTP-2871DP

Manufacturer: LEVELONE

EAN: 4015867241394

Product Code: 1222521

R17,879

The LevelOne GTP-2871DP is a 28-port L3 Lite managed Gigabit PoE switch designed for high-performance access and aggregation in modern business networks. It provides 24 Gigabit PoE+

ports for edge devices and 4 10G SFP+ uplink ports for high-speed connectivity to core or distribution switches. With wire-speed Gigabit access and 10G uplinks, it delivers the bandwidth needed for VoIP, Wi-Fi 6/6E access points, IP surveillance and cloud applications.

Featuring an ample 400W PoE power budget, the GTP-2871DP supplies up to 30W per port in accordance with IEEE 802.3af/at, enabling flexible deployment of power-hungry devices such as PTZ cameras, dual-band access points or video intercoms. Extended PoE support up to 250 meters in 10Mbps mode simplifies long-distance camera or AP installations without additional midspan injectors. Dual AC power inputs provide power redundancy, helping to ensure continuous operation even if one power source fails.

As an L3 Lite managed switch, the GTP-2871DP supports advanced IPv4/IPv6 features including VLAN (port-based and 802.1Q tagging), Spanning Tree (802.1d/w/s), LACP link aggregation, storm control and IGMP snooping for multicast optimization. Robust QoS and traffic control capabilities help prioritize critical services, while IPv6 management, security and multicast control make it ready for next-generation network deployments. This combination of high PoE capacity, 10G uplinks and resilient power design makes the GTP-2871DP an ideal choice for enterprise, campus and large SMB networks.
