4 of the 5 Auto-Negotiation RJ45 ports (Port 1 to Port 4) of the switch support Power over Ethernet (PoE) function. These PoE ports can automatically detect and supply power with those IEEE 802.3af compliant Powered Devices (PDs).

Intelligent Power Management

When total power consumption excels 55W, the intelligent power management will cut the lower priority port power off to ensure the high priority port’s power supply and protect the device from power overload operation.

Management Made Easy

TL-SG108PE offers network monitoring for users to observe traffic behavior. Through its web-based user interface and management utility, the TL-SG108PE offers a variety of useful features, including network monitoring, traffic prioritization, and enhanced QoS.

Sturdy Metal Casing

Sturdy, compact metal casing and shielded RJ45 ports, with desktop/wall-mounting design, to meet your needs in any environment. Besides, fanless design ensures quiet operation.
