FEEL EVERY MOVEMENT

Want to achieve greater tracking precision? Forget about a new mouse. The top layer of the Ancient Stone of GENESIS was created with a good quality fabric, which allows you to use the full potential of any sensor, but also reduces the friction of the sliders against the surface to a minimum. As a result,

you can count on a pleasant gliding experience, all while maintaining maximum precision.

STAY IN PLACE

We know how annoying it can be for a mouse pad to move on its own during fast movements. In order to prevent this from happening, rubber with anti-slip properties was used on its bottom. This ensures that even the most dynamic movements will not move the mousepad, and you will maintain full control over the situation.

OPTIMAL DIMENSIONS

Think a coaster can't take up too much space, but should be functional? Ancient Stone of GENESIS is just such a pad. Its dimensions are 250 x 210 x 2.5 mm. The low profile of the pad takes care of the comfort of use. Thanks to it, you can forget about the unnatural positioning of your hand and the pain associated with its curvature.

SEAMLESS COOPERATION WITH ANY SENSOR

Ancient Stone of GENESIS is a mousepad that will provide trouble-free operation for both laser and optical mice. So you don't have to replace your mouse. No matter what device you have, the mat will help you take your gameplay to the next level.
