Surveillance

Work with IP Cameras

Conference Call

Work with IP Phones

Wi-Fi Coverage

Work with Omada EAPs

Easy to Use

Power over Ethernet

Port 1-8 of the switch support Power over Ethernet (PoE) function. These PoE ports can automatically detect and supply power with those IEEE 802.3af/at compliant Powered Devices (PDs).

Intelligent Power Management

When total power consumption excels 63W, the intelligent power management will cut the lower priority port power off to ensure the high priority port’s power supply and protect the device from power overload operation.

Advanced Functions for Higher Performance

Qos
For Fluent Online Experience

Administrators can designate the priority of traffic based on QoS, for example, to ensure that voice and video applications remain clear and lag-free.

IGMP
Snooping
Traffic Optimization for IPTV

IGMP Snooping optimizes multimedia traffic delivery, to ensure a better network experience especially for applications like IPTV.
