The In-Cell Touch Open Frame has a touch function built into the display, allowing for the implementation of a slim design and a narrow bezel compared to general touch products that require additional touch parts (Film).

Clear Picture Quality

Compared to general touch products, TNF5P implements clear picture quality without milk effects caused by additional touch sensor film parts.

Design Flexibility

By providing integrated parts such as touchscreen, display, and webOS, users can realize free design for their own needs.

24hrs / 7days

TNF5P’s excellent durability allows for use in kiosks that require a full day of operation.

Wide Viewing Angle

IPS panel technology provides better control of the liquid crystals, which in turn allows the screen to be viewed at virtually any angle.

45-degree Tilt (Face up) Installation Possible

When a display is installed at low places, it is usually tilted for the user’s viewing comfort. Considering this, the installation with a max tilt of 45 degrees is supported.

10 Points of Multi-Touch

The TNF5P provides a more realistic touch sensation since it can recognize up to 10 points of multi-touch at once, and various touchbased user services can be provided through the screen.

High-Performance with webOS 6.0

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

webOS 6.0, upgraded in SoC* and web engine, is available on TNF5P for a smooth execution of several tasks. LG webOS smart signage platform enhances user convenience with intuitive GUI** and provides to SI or/and developers simple app development tools such as SDK (Software Development Kit), SCAP, sample applications.
