Use this Transmitter unit for the IH2006-KVM-EXTENDER to extend an HDMI-enabled computer over IP, with support for RS-232 pass-through and 3.5mm audio

The AVoIP KVM Transmitter enables remote access to computers over a TCP/IP network using a keyboard, mouse, and 4K 60Hz HDMI monitor when paired with a compatible receiver. Designed as a replacement unit, it ensures continued performance, security, and uptime by protecting systems from unauthorized access and physical damage.

Driver-Free Installation

The plug-and-play design requires no drivers or software, making setup quick and hassle-free. It is compatible with all major operating systems, including Windows, macOS, and Linux, as well as hardware platforms like Intel, AMD, Snapdragon/ARM, and Apple Silicon.

Scalable, Flexible, and Future-Proof

Designed to seamlessly integrate with existing IH2006 Series Receivers, this transmitter offers a hassle-free replacement option, keeping your AV infrastructure running smoothly and maximizing uptime.

Professional-Grade Design

The transmitter features a durable metal housing with mounting kit for wall or under-desk installation, along with rubber feet for desktop stability. A local HDMI output allows direct connection to a nearby display, while RS232 and 3.5mm audio passthrough ports enable seamless serial and audio extension.

The StarTech.com Advantage
