

Kingston Technology UV300 120 GB 2.5" Serial ATA III

Model: SUV300S37A/120G

Manufacturer: KINGSTON

Product Code: 12538

R561 R603

Kingston's SSDNow V300 solid-state drive is a cost-effective way to revive your computer. It's 10x faster than a hard drive plus more reliable, more durable and shock-proof. It features an LSI® SandForce® controller customised for Kingston and best-in-class components, and is available in kits with all the accessories needed for an effortless transition to the latest technology. For added peace of mind, it's backed by a three-year warranty, free technical support and legendary Kingston® reliability.

Features

- Fast — 10x faster than a 7200RPM hard drive
- High Quality — features an LSI® SandForce® controller customized for Kingston
- Reliable — with no moving parts, solid-state drives are less likely to fail than standard hard drives
- Economical — design optimized to make migrating to an SSD more affordable

- Convenient — all-in-one kits with all the components for easy installation
- Multiple capacities — to fit your workload
- Guaranteed — three-year warranty, free technical support and legendary Kingston reliability

Hard drive replacement

Solid-state drives are the next evolution of PC storage and run faster, quieter and cooler than the aging technology inside hard drives. With no moving parts, SSDs are also more durable and more reliable than hard drives.

For desktops and notebooks

Kingston solid-state drives will make your system more responsive so it boots quicker, loads applications faster and shuts down faster. They're available in upgrade kits that include software to clone your files and OS in minutes.

Revive older systems

Solid-state drives will not only increase performance but can also be used to breathe new life into older systems. Choosing an SSD can save you the cost of buying a new PC by reviving the system you already own.
