

Samsung 4GB DDR3 1333MHz Unbuffered SODIMM memory module 1 x 4 GB 204-pin SO-DIMM

Model: M471B5273CH0-CH9

Manufacturer: SAMSUNG

Product Code: 13052

R565 ~~R607~~

First in the Market with Advanced DDR3.

Double Data Rate Three, Synchronous DRAM, or DDR3, is the new generation of high performance, ultra-low-power memory interface technology used in high performance servers, desktops and notebooks. As the number one supplier in memory, Samsung continues to lead the industry with cutting-edge SDRAM products from the first DDR in 1997, DDR2 in 2001 and DDR3 in 2005. Samsung's high performance main memory solutions are based on JEDEC standards and leverage the company's leadership in advanced research and development of semiconductor process technology.

Samsung's DDR3 brings new levels of performance to notebooks, desktops and servers and pushes the envelope in key areas like power consumption, speed and bandwidth. Our recent 30nm class, 1.35V, 2Gb DDR3 is the world's first ultra-low-power memory technology, with more than a 76% power savings over traditional DDR2 at 2x the bandwidth. When you're ready to make a move to DDR3 or are considering upgrading your systems, we're here to provide the best optimal solution for enhancing your competitive edge.
