- Key Features: Achieve performance at scale with the PowerEdge portfolio Our modern compute platforms are built to scale easily and take advantage of technologies that lift application performance. The PowerEdge R540 rack server combines affordably and versatility, so you can adapt to a variety of applications and meet future demands. Scale compute resources with 2nd Generation Intel® Xeon® Scalable processors and tailor performance based on your unique workload requirements. Optimize application performance with one-button tuning. Enable storage flexibility with up to 12 x 3.5" drives. Free up storage with boot-optimized M.2 SSDs. Power your applications with a versatile 2-socket rack server Satisfy a variety of applications with the flexible PowerEdge R540. Its balanced combination of resources, expandability and affordability adapt to the changing demands of a modern data center. Optimize your application performance with one-button tuning. Scale for future requirements with up to 14 x 3.5" drives. Embedded diagnostics and SupportAssist help to maximize uptime without added effort, in a worry-free environment. Ideal for: Virtualization Mail Messaging Video streaming The New Generation of PowerEdge Servers Gain productivity with intelligent, embedded management Dell OpenManage intelligent automation enables you to spend less time on routine maintenance so you can focus on business-critical priorities. Help maximize uptime and reduce the IT effort to resolve issues by up to 72%1 with ProSupport Plus and SupportAssist. Leverage existing management consoles with easy integrations for VMware® vSphere®, Microsoft® System Center and Nagios®. Improve productivity with agent-free Dell iDRAC9 for automated management. Simplify deployment with OpenManage next-generation console and server profiles to configure and prep servers rapidly and scalably. Fortify your data center with comprehensive protection A comprehensive, cyber-resilient architecture with security embedded into every server helps to protect your data. Protect server configuration and firmware from malicious changes with new Configuration Lock-down. Use system erase of local storage to help ensure data privacy when you repurpose or retire servers. Automate updates that check file dependencies and proper update sequence, before deploying them independently from the OS/hypervisor. Take control of your firmware consoles with embedded
