H330 RAID (Excl Rail Kit) Server

Model: DL-R440-CTOX2

Manufacturer: UNBRANDED

Product Code: 13144

R63,290 ~~R67,890~~

- Key Features: Performance in a density-optimized 1U, 2-socket rack server Experience an outstanding balance of performance and density for scale-out computing. The PowerEdge R440 brings you value in a small form factor. Benefit from platform flexibility and maximize performance with dual 2nd Generation Intel® Xeon® Scalable processors, up to 16 DIMMs and scalable storage that lets you mix SSDs and NVMe PCIe SSDs. Embedded diagnostics and SupportAssist help the R440 to deliver maximum uptime in a worry-free environment. Ideal workloads: HPC Web tech Scale-out infrastructure PowerEdge-R440 - Deliver performance at scale with the PowerEdge portfolio Deliver performance at scale with the PowerEdge portfolio Modern compute platforms from Dell are designed to scale easily and use technologies that maximize application performance. The PowerEdge R440 rack server provides choice and flexibility that lets you optimize performance and density. Scale compute resources with 2nd Generation Intel® Xeon® Scalable processors and tailor performance based on your unique workload requirements. Free up storage with boot-optimized M.2 SSDs. PowerEdge R440 Rack Server-Gain productivity with intelligent, embedded management Gain productivity with intelligent, embedded management Dell OpenManage intelligent automation enables you to spend less time on routine maintenance so you can focus on business-critical priorities. Help maximize uptime and reduce the IT effort to resolve issues by up to 72% with ProSupport Plus and SupportAssist. Leverage existing management consoles with easy integrations for VMware® vSphere®, Microsoft® System Center and Nagios®. Improve productivity with agent-free Dell iDRAC9 for automated management. Simplify deployment with OpenManage

next-generation console and server profiles to configure and prep servers rapidly and scalably. PowerEdge R440 Rack Server-Fortify your data center with comprehensive protection Fortify your data center with comprehensive protection A comprehensive, cyber-resilient architecture with security embedded into every server helps to protect your data. Protect server configuration and firmware from malicious changes with new Configuration Lock-down. Use system erase of local storage to help ensure data privacy when you repurpose or retire servers. Automate updates that check file dependencies and proper update sequence, before deploying them independently from the OS/hypervisor. Take control of your firmware consoles with embedded authentication that is designed to allow only properly signed updates to run.

- Warranty: 1 Year
