

Seagate FireCuda 120 500 GB 2.5" Serial ATA III 3D TLC

Model: ZA500GM10001

Manufacturer: SEAGATE

Product Code: 13234

R1,655 ~~R1,770~~

Designed for speed and endurance, the highly-adaptable FireCuda® 120 SSD is ready for rigorous PC gaming. With 5,600 TB TBW durability and maxed out SATA III speed — this SSD plugs in easily, roars to life, and lasts a lifetime. Whether you're improving your PC or giving your battlestation extra backup, FireCuda 120 SSD is ready to play.

Upgrade Your Gaming Experience

FireCuda® SSD solutions are designed and built specifically with the needs of professional-level gamers in mind.

Go further with a gaming SSD built for industry-leading speed, sustained abuse, lowest latency and superior gaming.

Faster Gaming with PCIe Gen4

Unleash the speed of PCIe 4.0 x4 with FireCuda 520 PCIe Gen4 SSD, our newest M.2 NVMe SSD built for pro-level gaming and nearly 45% faster than previous generations.

This solid-state gaming drive is out-of-the-box compatible with the new X570 chipset and easily plugs directly into any PCIe Gen4 motherboard for a compact performance boost to your PC build.

The Most Competitive Edge

NAND Acceleration Upgrade to PCIe Gen4 x4 on next-gen 3D TLC NAND in a M.2 2280 NVMe form factor, and sequential read/write up to 5,000/4,400 MB/s.

Leading Performance Dominate with a plug-and-play gaming storage boost that is backwards compatible with PCIe 3.0 platforms and AMD X570 chipset PCIe 4.0 motherboards.

Level Up to Impressive

Standard drives won't help you level up because they aren't made for the sustained abuse of top-tier gaming.

FireCuda 510 SSD delivers durable speed for the long haul, and provides fast PC gaming storage speeds so you spend less time loading levels and maps, fewer seconds respawning, and reduced stuttering in open-world gaming.

Game Like a Pro

Boss Level Speed Unleash PCIe G3 x4, NVMe 1.3 speeds up to 6x faster than SATA SSD, and sequential read/write up to 3,450/3,200 MB/s.

Gaming Versatility Upgrade your gaming laptop or PC with a super slim M.2 2280 internal SSD, in capacities up to 2 TB.

Future Reliability Leverage an internal solid-state drive built for 1.8M hours MTBF and up to 3,600 TB TBW (Total Bytes Written).

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Load Fast, Play Hard

Designed for speed, endurance, and capacity, FireCuda 120 can take everything PC games throw at it.

With up to 4 TB of space, maxed out SATA 6 Gb/s speeds, and the durability of up to 5,600 TB TBW (Total Bytes Written), this SSD plugs in and loads up quickly. Give your battlestation a boost, the FireCuda 120 is ready to play.

Ready to Play

Super SATA Speeds Unleash SATA 6 Gb/s speeds of 560/540 MB/s (sequential read/write) — up to 30× faster than hard drives.

High Capacity Build up your library with multiple capacities up to 4 TB.

Long-Term Reliability Built for 1.8M hours MTBF and up to 5,600 TB TBW (Total Bytes Written), this SSD keeps playing.

A Winning Duo

Our FireCuda 520 and FireCuda 510 solid-state drives are built to provide you with more cores, more cache, more tech, and more I/O. Both PC gaming drives are out-of-the-box compatible with the latest generation of powerful AMD Ryzen™ processors.

Pair an AMD Ryzen 5000 Desktop Processor with the new FireCuda 520 to unlock true PCIe Gen4 speeds for the ultimate PC gaming builds.

Centralise Your BattleStation

Level up your laptop gaming experience with FireCuda Gaming Dock — an elite 4 TB Thunderbolt 3 storage hub equipped with an array of ports and killer looks so that you can organise your space, connect your peripherals, and complement your rig.

Speed Up Your Creativity

The speed and durability of these solid-state drives make them a great solution for creative professionals who need files processed faster.

Sequential read/write speeds can handle multiple video streams writing to the drives, and high IOPS ensure consistently smooth streaming.

FireCuda Gaming Drives

Fast. Dependable. Versatile.

Benefit From SeaTools

SeaTools™ SSD is our free software that tests and analyses our drives. It is completely data safe and easily installs on your system.

Features include:

- Drive health monitoring
- Drive performance monitoring
- Firmware and software updates

Insure Your Drive

A Rescue Data Recovery Services plan is available for purchase when you register your FireCuda drive. You'll have access to a global team of world-class data recovery experts in case of unexpected data loss.
