

LG GH24NS95 optical disc drive Internal DVD±RW

Model: GH24NS95

Manufacturer: LG

Product Code: 15367

R276 R546

Engrave Today, Preserve for a Lifetime

24x Writing Speed

Instantly enhance any system and enjoy a higher level of disc writing performance at a max speed of 24x. This increased speed lets you burn more discs in less the time, therefore allowing you to enjoy greater time management and overall efficiency.

Superior data protection with M-DISC Support

The M-DISC uses a patent rock-like recording surface instead of organic dye to etch your data onto a disc. The M-DISC has been tested and proven to outlast standard DVDs currently on the market.

Play in peace

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

As a disc is being read, Silent Play technology automatically controls the disc read speed for optimal noise reduction.

Nonstop playability

Jamless Play automatically prevents stop video playback in case of damaged disc, such as scratches or fingerprints by jumping through the erroneous data or damaged areas.

SATA

Serial ATA is a 1.5Gbps evolutionary replacement for the Parallel ATA physical storage interface used to connect storage devices, such as hard disks, DVD and CD rewriters to the PC motherboard. Serial ATA is scalable, enables design of smaller PCs, and will allow future enhancements to the computing platform.
