- Chromebox for Meetings is an easy solution powered by Google Hangouts, which is simple and intuitive to operate. Start a scheduled meeting by pushing one button or start a meeting on the fly by just giving it a name.

Collaboration tools included

- Share screens wirelessly and edit documents in real time as a group with optional Google Apps for Work.

Meetings with anyone

- Join a meeting from almost any PC, phone, or tablet by just clicking a link. Dial out to remote participants or add a phone number for dial-in access. Add optional services to integrate with existing phone and videoconferencing systems.
