HPE MSR954-W 1GbE SFP (WW) Router

Model: JH297A

Manufacturer: HEWLETT PACKARD ENTERPRISE

EAN: 889296338437

Product Code: 202849

R18,549

The HPE MSR954-W (WW) wireless router is designed to meet the demands of modern businesses, offering a blend of performance, security, and connectivity. With support for advanced encryption standards such as 128-bit AES, 192-bit AES, and 256-bit AES, it ensures that your data remains secure during transmission. This device provides versatile networking options with both wired and wireless connectivity, including Gigabit Ethernet and 802.11b/g/n Wi-Fi bands. Integrated with a 4-port switch, the MSR954-W (WW) facilitates easy network expansion and supports a wide range of data link protocols, making it suitable for various networking needs. It is equipped with a Marvell A370 processor and DDR3 SDRAM, ensuring efficient performance across its functionalities. The router's capacity to handle up to 100 VPN tunnels and extensive routing table entries makes it an ideal choice for businesses looking for smooth and secure data flow. Moreover, the MSR954-W (WW) comes with advanced networking features like Access Control List (ACL) support, Quality of Service (QoS), and VLAN support, providing sophisticated tools for network management and optimization. Its compliance with numerous standards, including IEEE, RoHS, and WEEE, along with its ability to operate within a wide range of temperatures and humidity levels, ensures reliability and durability in professional settings.
