Kingston's DC600M SSD is a 4th generation data center SATA 3.0, speedy SSD with 3D TLC NAND intended for "mixed use" workloads. The DC600M is suited for use in high-volume rack-mount servers and includes hardware based on-board PLP. Via power loss capacitors, DC600M protects data against unexpected power failure to reduce the possibility of data loss and ensure that the drive will successfully re-initialize on the next power-up of the system. DC600M is designed to deliver latency and IOPS consistency for system integrators, hyperscale data centers, and cloud service providers. Product Description: Kingston DC600M - SSD - Mixed Use - 960 GB - SATA 6Gb/s | Type: Solid state

drive - internal | Capacity: 960 GB | NAND Flash Memory Type: 3D triple-level cell (TLC) | Form
